Summary of reasons for decision:

The computer moving image file is a copy of a feature-length Japanese adult DVD. The file is classified as objectionable because it tends to promote and support the use of urine in association with degrading conduct. It does this by encouraging the intended male audience to find women's degradation in association with the use of urine sexually arousing. As a court-referred publication,

excisions to remove the objectionable material cannot be recommended.

The classification of this publication interferes with the freedom of expression as set out in the New Zealand Bill of Rights Act 1990, but this is an outcome that is consistent with Parliament's intention that publications falling under s3(2) of the Films, Videos, and Publications Classification Act are deemed to be objectionable.
